23. Problem: (use additional Sheets if necessary)
This TE delivers the 6A.06 version of the fileincache utilitiy used during DataPool Inserts using AMASS. This utilitiy must be built with the correct 5.3 version of the AMASS API. This TE must be installed in all MODEs that have 6A.06 DPL (Synergy II) code at the same time that the AMASS 5.3 COTS is installed.

24. Proposed Solution: (use additional sheets if necessary)
Deliver TE_6A.06_DPL.13 to all DAACs to be installed when AMASS 5.3 is installed.

25. Alternate Solution: (use additional sheets if necessary)
Delay the installation of AMASS 5.3 until the next patch of DPL is installed.

26. Consequences if Change(s) are not approved: (use additional sheets if necessary)
The syslog on IRIX65 host that use the fileincache will be flooded with messages if the new version of AMASS is installed and the new fileincache utilitiy is not installed.

27. Justification for Emergency (If Block 15 is "Emergency"):
The AMASS 5.3 has been requested by the DAACs.
